

Install Wordpress using Docker Compose

This stack can be used to install Wordpress with a MySQL DB. Change the ports and volume binds as you need.

```
version: '2'

services:
  db:
    image: mysql:5.7
    volumes:
      - /docker/wordpress/db:/var/lib/mysql
    restart: always
    environment:
      MYSQL_ROOT_PASSWORD: wordpress
      MYSQL_DATABASE: wordpress
      MYSQL_USER: wordpress
      MYSQL_PASSWORD: wordpress

  wordpress:
    image: wordpress:latest
    ports:
      - 8977:80
    restart: always
    environment:
      WORDPRESS_DB_HOST: db:3306
      WORDPRESS_DB_USER: wordpress
      WORDPRESS_DB_PASSWORD: wordpress
    volumes:
      - /docker/wordpress:/var/www/html
```
